 Name / Surname.....
 Address.....
 Town - Postal Code - State - Country.....
 Phone / Cell..... Email.....

Sample Information **Sample ID**.....
 Bird ID or Swab ID.....
 Species (Scientific Name).....
 Species (Custom Name).....
 Type of sample *.....
 Comments.....

Samples: Feathers or Blood
 Remove 4-6 feathers from the dorsal area. DO NOT TOUCH THE QUILT of the feather! Attach the feather with tape without touching the quilt or alternatively place the feathers in a small plastic bag and staple the bag to the form.

Place 3-5 drops of blood. Let dry before filling the form.
 Please be certain when collecting your samples always clean hands before each sample collection. Do not touch the quilt on the submission form or quilt.

Environmental Test Sample Form
 Collecting for testing.

Please collect samples from one different source, where you have the birds. You must use only one source. Use the sample frequency throughout the area you wish to test.

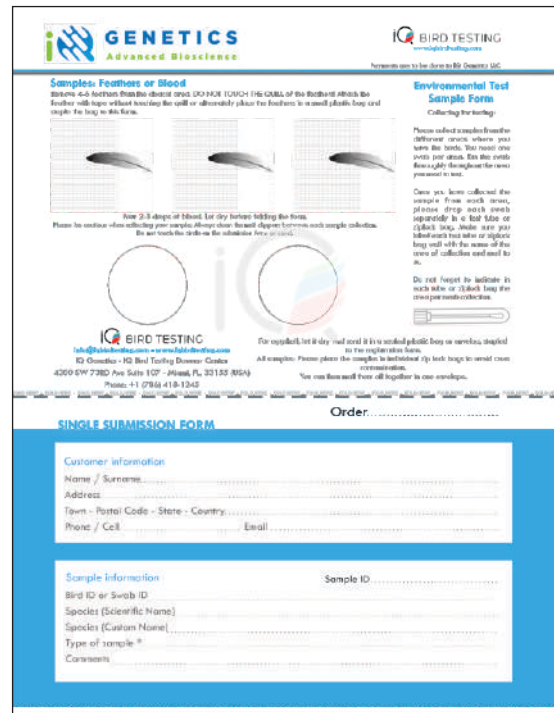

Once you have collected the sample from each area, please drop each sample separately in a zip lock or ziplock bag. Make sure you label each bag with or signpost bag with the name of the area of collection and send to us.

Do not forget to indicate in each tube or ziplock bag the area of sample collection.

iQ BIRD TESTING
 info@iqbirdtesting.com • www.iqbirdtesting.com
 IQ Genetics - IQ Bird Testing Denver Center
 4300 SW 73RD Ave Suite 107 - Miami, FL 33155 (USA)
 Phone: +1 (786) 418-1245
